

Payment System

Security of electronic communications sent to Narodowy Bank Polski under the Oversight

In order to ensure the confidentiality of the data submitted to Narodowy Bank Polski under the Oversight, the documentation sent by email should be encrypted using the appropriate certificates issued by NBP:

- For the purposes of reporting conducted by entities operating payment systems, payment schemes and securities settlement systems, i.e. information sent to the address raporty.oversight@nbp.pl, it is necessary to install in the email program the **raporty.cert** certificate.
- With regard to the administrative proceedings concerning the payment schemes and payment systems, i.e. information sent to the address nadzor@nbp.pl, it is necessary to install in the email program the **nadzor.cert** certificate

Older versions of the certificate expired on 5.03.2021.

For technical reasons, in the electronic correspondence sent to NBP the total size of all the attachments in a single mail **cannot exceed 15 MB**. If the size of information sent to the NBP exceeds the maximum size set in the e-mail system, it is possible to use the file exchange system - System Wymiany Plików NBP (SWP).

Additional information concerning certificates issued by NBP or other forms of authentication used by NBP can be found on the NBP website in the tab dedicated to the Public Key Infrastructure: Narodowy Bank Polski – PKI.

In case of any technical issues related to the implementation and maintenance of the certificates, please contact the Key Certification Centre: cck@nbp.pl.

System Wymiany Plików (SWP) – file exchange system

SWP is a service that enables data exchange between the NBP and external entities. Within SWP, it is possible to create a virtual file sharing area dedicated to an external entity that enables sending files that exceed the limit set in the e-mail system.

Detailed information on the rules for requesting and granting access to the SWP file exchange system and the rules for its safe use, as well as instructions for an external entity, can be obtained by contacting nadzor@nbp.pl.
